

TESCON

The name Tescon stands for company's main targets: technical service, engineering, security and construction. The core competence of Tescon covers the design and manufacturing of products in the fields of high security, counter-terrorism and urban security in accordance to standards like CEN CWA 16221, PAS 68 and 69. Worldwide airports, ministries, hotels, prisons, embassies, military facilities, nuclear electric power plants as well as oil and gas industrial facilities are equipped with these products designed and developed by Tescon engineers.

The company's broad product portfolio includes but is not limited to bollards, road blockers, tyre killers, crash-rated sliding gates, barriers, detected fencing (with intruder detection) and more.

Advantages of Tescon:

- Anti-Ram products to stop attacks with hostile vehicles
- Tailor-made solutions matching individual demand
- Products made in Germany designed and engineered by experienced employees
- Low-maintenance applications

Ideal solution for the safety of a property:

- Maximum level of security
- Fast closing barriers and anti-terror bollards
- Road blockers and tyre killers for any purpose
- Suitable gates for any application - including all necessary accessories like traffic-lights, sensors, induction-loops
- Installation – Training - Maintenance - Troubleshooting

Tescon is looking for business partners in Canada!

In order to introduce their products in Canada, Tescon is looking forward to meet potential distribution partners as well as owners and managers of high security buildings and facilities (e.g. government buildings, airports, banks, embassies, hotels etc).

If you are interested in discussing potential business opportunities with Tescon, please contact:
